

# Skidaway Learning Garden Challenge

*Use the interpretive signs to find answers to these questions!*

Why did we plant the Learning Garden?

When was the garden planted?

What water source do we use to irrigate the garden?

How many gallons of rainwater does each cistern hold? All four?

What is a rain garden?

How do rain gardens help coastal areas?

Name three native plants that are found in the garden.

What is the name of the clumped grass at the garden's edge?

*More questions on the back!*

Name two plants that have berries.

Name three animals that use the forest floor.

How tall can a pine tree grow?

How long can a live oak live?

How many years may it take for a field to become a forest?

Name three animals that use the crowns of trees.

How many species of birds use areas where field meets forest?

Name two birds that you might see in the maritime forest.

Name two animals that act as flower pollinators.

What is one way that you can protect pollinators?

Name three different turtles that live in the turtle pond.

*Congratulations! Now teach someone else what you learned!*
